

## Modern Rehabilitation in Osteoporosis, Falls, and Fractures

### New Drugs, Exercise, Cognitive Stimulation, and Preventive Management

© 2014 Wolters Kluwer Health | Lippincott Williams & Wilkins

**OBJECTIVE:** This comprehensive review of osteoporosis, falls, and fractures offers a new perspective on topics that have been discussed in the past. The authors discuss the latest research on osteoporosis, falls, and fractures, including the use of new drugs, exercise, cognitive stimulation, and preventive management. The authors also discuss the importance of patient education and the role of the primary care physician in the management of these conditions. The authors provide a comprehensive overview of the current state of research on these topics and discuss the implications for clinical practice. The authors also discuss the importance of patient education and the role of the primary care physician in the management of these conditions.

**KEYWORDS:** osteoporosis, falls, fractures, exercise, cognitive stimulation, preventive management

**INTRODUCTION:** Osteoporosis, falls, and fractures are major public health problems. They are associated with significant morbidity and mortality, and they are preventable. This review discusses the latest research on these conditions and the implications for clinical practice.

**KEYWORDS:** osteoporosis, falls, fractures, exercise, cognitive stimulation, preventive management
